Agreement on the use of generative artificial intelligence (gAI) in the final thesis

Important information:

Before work on the thesis begins, the student and the thesis supervisor must agree on the use of gAI. The result of this agreement must be recorded here under point 3 Agreements on the use of gAI. Together with the final thesis, students must then submit a declaration of independence in which, among other things, they assure compliance with the agreements made on the use of gAI. In addition to the agreements on the use of gAI, the rules of good scientific practice continue to apply, such as the correct handling of data, sources and material and, above all, the correct handling of the intellectual property of others. Please also note the regulations of the current examination regulations on attempts to cheat in examinations.

1. Information on the thesis:

Supervisor:

Student:

Thesis title:

2. Explanations on the use of gAI in the thesis

Generative artificial intelligence (gAI) tools may only be used to the extent agreed with the supervisor. Internet sources or AI applications may only be used in the form shown below. All passages taken verbatim or in spirit from publications must be labelled as such. AI tools may only be used as aids, if at all; the creative influence of the student must predominate in the thesis. The use of machine-generated texts does not guarantee the quality of the content and text. The responsibility for adopting the machine-generated text passages used lies with the students. The extent to which gAI may be used for the preparation of the thesis must be specified in a list.

3. Agreements on the use of gAI

In this work, I have used gAI systems as follows:

Not at all

For idea generation

For creating the outline

For writing specific passages, amounting to   % of the total text

For developing software source code / programme-code

For optimizing or restructuring software source code

For proofreading or optimizing

Other, namely:

4. Bestätigung

Supervisor and student confirm the agreements on the use of gKI set out in point 3.

Signature of the supervisor   Signature of the student
